

PAGANI TG63-15

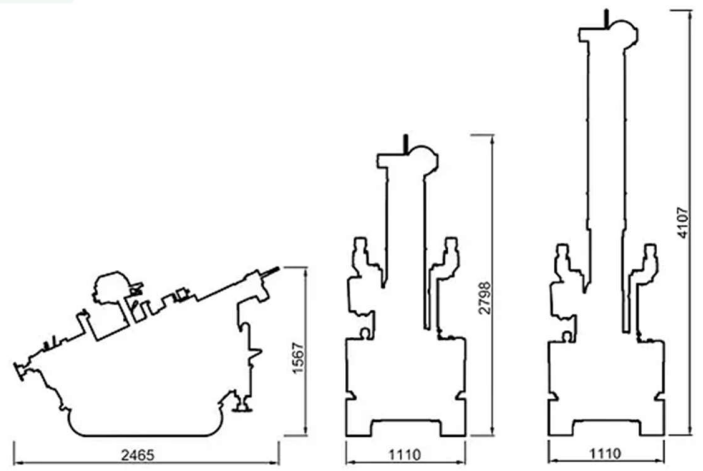

Description

A fully hydraulic rig that with its compact size and rubber tracks can access difficult sites with ease. Pagani TG63-150 has its anchoring system built into the rig, depending on ground conditions anchor heads can be switched. Anchor heads range from 300mm heads to 100mm screw heads, leading to the best possible anchorage on each site.

Capabilities

- Compact size
- Easy to manoeuvre
- In situ testing up to 30m depth
- Cone penetration testing
- Dynamic probe test
- Direct drive sampling
- Anchorage in almost all ground conditions
- Drop hammer for dynamic testing and sampling is 63.5kg

Dimensions

Specifications

Height: 1.6m (mast down)
Length: 2.5m
Width: 1.2m
Weight: 1,110kg
Push capacity: 15 tons (with anchorage)
