

CPT100 Box Crawler

Description

The Boxed Crawler CPT100 series is a ballasted and fully contained crawler mounted unit for CPT testing, whatever the ground conditions. This next-generation unit represents a complete redesign of the CPT crawler system.

Capabilities

- Remote control for operator Safety
- Ballasted weight to 15t
- 4 levelling jacks, ideal for uneven ground conditions
- Narrow footprint for tight driveways
- Second saturation for optimal u2 response
- Ability to conduct Dissipation testing
- Seismic Capabilities
- 100MPa Digital cones, Expandable with modules but not limited to:
 - Temperature
 - Video
 - Seismic
 - Magnetic field
- Fast, Cost effective soil profiling
- Accurate GPS co-ordinate system

Specifications

Dimension (LxWxH)	4.711 x 2.000 x 2.800mm (3.461 Working Height)
Weight (without ballast)	13.000 kg
CPT stroke	1.250 mm
Pushing force	200 kN
Uplift force	250 kN
